Indian Institute of Management Bangalore | External Member |

ACKNOWLEDGEMENTS

The journey towards a PhD while hailed as a solitary journey, is not something that is completed alone and I am indebted to the numerous people who assisted and supported me through the years of this journey. First and foremost, I would like to express my gratitude for my advisor, Prof Gopal Naik, for his indefatigable patience and kind support. Even when I was confused and struggling to find a path, Prof Naik extended his boundless kindness and guidance. This dissertation would not be what it is without his support and faith. Prof Srivardhini K Jha worked with me throughout the writing of this dissertation, and helped wherever she could – in the macro details of the story or in the micro details of the writing. I am forever indebted to her for teaching me the meticulous process of writing a paper. Prof Deepak Malghan was generous and kind to share his time, effort, and painstakingly put together data to help me complete this dissertation. Prof Rajalaxmi Kamath has been a source of inspiration and support in matters related and unrelated to the dissertation. I'm grateful to her for all that I could learn from her and also for trusting me with the responsibility of teaching the students in the inaugural Pre-Doctoral Program at IIMB. In addition to their tremendous contributions to my dissertation, I would like to thank Prof Gopal Naik, Prof Deepak Malghan, Prof Rajalaxmi Kamath, Prof Srivardhini K Jha for being the kind of teachers that I hope to one day be.

IIMB would always remain the place that considerably shaped and expanded my world view and it is undoubtedly because of all the people that I met there. I have benefitted greatly from the support of all my batchmates – the FPM Class of 2014 – and their advice, criticisms, and conversations. I would like to thank Sunil Reddy Kunduru, Abhipsa Pal, Siddhartha Srivastava, Ravi Pandey, Ravi Ranjan, Romana Gulshani for their presence in my life and all their support. I would be remiss if I do not mention my senior and junior FPM colleagues – Chetan Chitre, Aparna

Krishna, Naveen Bharathi, Sesha Sai Ram Meka, Narayanan Gopalakrishnan, Ajit Phadnis, Shivangi Rajora, Gopi Shankar, Soumya Pal, Bibek Bhattacharya, and Anupama Kondayya for the many spirited and wide-ranging conversations that we have had over the years.

The doctoral program office and CPP office at IIMB have both been instrumental in smoothing the day-to-day stresses and steps during the PhD journey. I would like to acknowledge Prof Rejie George Pallathitta, Prof Haritha Saranga, Mr Sharath, Ms Anjali (Retd) and Ms. Ashoka and the tireless and ever helpful Ms Shilpa Puttaramu for their assistance in navigating the administrative paperwork required in a long-term program. The library and library staff at IIMB requires a special mention as it is the safe haven of many a doctoral student. The security staff at the library have always been friendly faces and ever willing to assist. I also want to acknowledge and thank the workers at the student mess – you have done so much – and the janitorial staff at IIMB who kept our rooms and cubicles clean, thus enabling meaningful work to take place in those spaces.

I have to especially mention my friends, Gayathri and Madhura, for being the bastions of strength and sanity in my life – for letting me lean on them when I needed the support and for trusting me enough to lean on me when they needed it. None of this would have been possible without the love, support and strength that my parents gave me throughout these past years, and for that I thank my parents. All of these people, especially the ones that are too many to name, have played an important role in enabling me to write and complete this dissertation. And I note my gratitude.
